

AdhereRx™ Overview

An AdhereHealth Company

AT-HOME PHARMACY DELIVERY

For High-Risk Medically
Complex Patients

AdhereRx™ is a nationwide closed door retail pharmacy that offers scheduled hand-delivery of medications every 30 days to elderly and chronically ill patients with multiple daily prescriptions. AdhereRx™ provides your patients with a white-glove pharmacy experience and gives you the confidence that your most complex patients will be able to stay on track with their medication adherence.

Tech-enabled Pharmacy

AdhereRx™ uses your ongoing membership and pharmacy data to engage high-risk patients, coordinate care teams and identify drug therapy problems

Private Courier Delivery

Our fleet of friendly HIPAA-certified couriers—who wear gloves for patients' health and safety—provide scheduled hand-delivery of 30 days' worth of medications right to the home, including Schedule III-V controlled substances

Monthly Medication Reconciliation

By reviewing the unique medication regimens with each patient, reducing confusion and removing barriers, each person becomes more adherent

Complex Care Management

We work with patient care teams to adjust medications and also offer 24/7 personalized clinical communication

AdhereRx Optimal Adherence by Measure

AdhereRx™ evaluated data across hypertension, diabetes and asthma adherence levels for a specific population. By moving to a high clinical interaction concierge delivery model, positive outcomes were seen in adherence and annual economic impact for each of the respective measures.

Value (PMPY)

\$223.85

Hypertension

\$159.92

Diabetes

\$305.83

Asthma

Elevated Clinical Efficacy

The following data demonstrates how AdhereRx™ identified a large percentage of Drug Utilization Reviews (DURs) improving the quality of patient care, enhancing therapeutic outcomes by titrating prescriptions and reducing inappropriate pharmaceutical expenditures, thus reducing overall health care costs.

6195.0 Clinical Reviews
per 1,000 Patients

786.5 DURs per 1,000
Patients

86.0 Polypharmacy Interventions
per 1,000 Patients
