Total Cost of Care Solution

The total cost of care solution utilizes provider focused outreach or consumer outreach to engage with target populations to address gaps in care that lead to unnecessary costs.

Results and Impact

AdhereHealth partnered with a \$2-billion-dollar organization to address high instances of asthma-related ER visits and hospitalizations related to chronic conditions.

The Adhere platform identified that nearly **25%** of that group had care gaps. Using tech-enabled outreach, we were able to resolve **12,000** care gaps within the first year alone. This engagement led to an overall **\$2,260** in savings per care gap and a savings of **\$227.46** per person, resulting in a **4.5:1** ROI for the organization.
