

# Accelerate COVID-19 Vaccinations

## For Your Underserved Communities

Rapidly increase vaccination rates through outbound tech-enabled intelligent tele-pharmacy engagement and overcoming SDOH barriers of care

## It's Not the Genetic Code, It's the Zip Code

Access to medical services is crucial to being healthy. The populations most impacted by COVID-19 with the highest hospitalization and mortality rates also have the lowest vaccination rates.

### Those most vulnerable:

- Come from traditionally marginalized populations
- Often distrust state and health systems
- Have low health literacy
- Struggle with access to pharmacy
- Have challenges with mobility and transportation
- Have difficulty scheduling appointments

**70%** Outcomes Driven by SDOH Related Issues

## Our Adhere™ Platform Supports Equitable Access for COVID-19 Vaccinations

Our Adhere™ Platform rapidly increases vaccination rates for vulnerable individuals through state-wide outbound intelligent tele-pharmacy, instilling health literacy, overcoming SDOH and coordinating with available vaccination clinics.

## Prioritize: Identify High-Risk Individuals

The Adhere™ Platform's analytics engine prioritizes the highest risk individuals:

- Identify chronic diseases with poorest COVID-19 disease outcomes
- Categorize marginalized populations
- Beneficiary types: Medicaid, Exchange, Duals, Behavioral Health, Disqualified Medicaid members

## Engage: Intelligent Clinical Workflow

AdhereHealth's intelligent clinical workflow tool enables employed tele-pharmacy clinical networks to perform outreach for vulnerable and high-risk individuals.

- Screen for safety and efficiency of vaccines for patients with specific disease states and comorbidities
- Assess medication adherence and pharmacy access
- Discuss vaccination health literacy
- Identify SDOH preventing vaccinations for individuals

## Resolve: Overcome Barriers of Care

Our integrated pharmacy team schedules necessary transportation to available vaccination clinics, addresses food insecurity, coordinates with physicians and provides access to pharmacy.
