

AdherePack™ by AdhereRx

Increase Medication Adherence and Improve Value-Based Outcomes with Compliance Packaging

AdhereRx is a closed-door pharmacy with compliance packaging capabilities that serves high-risk patients with social determinants of health (SDOH) barriers that cause habitual medication non-adherence. AdherePack™, the AdhereRx compliance packaging solution, increases adherence to directly improve value-based outcomes in Star Ratings, HEDIS®, hospital readmission rates, Medical Loss Ratio (MLR) and CAHPS® consumer experience survey outcomes.

Health Plan Care Management Referrals

- Using claims data, our analytics identify high-risk patients that can benefit from AdherePack and alert the health plan clinical care team
- Health plan clinical teams describe the benefits of compliance packaging and securely message AdhereRx for expedited patient referrals
- AdhereRx clinicians contact the patient or caregiver, offer the compliance packaging pharmacy to the patient and explain the benefits in more detail
- Health plans have access to powerful data visualization dashboards

96% of patients take medication as directed with compliance packaging, resulting in **medical utilization cost savings** between **\$8 - 12,000** annually.

The Disproportionate Cost Impact of Non-Adherence

- Overall Medical Loss Ratio (MLR) is disproportionately impacted by the top 5-10% of high-cost membership
- 66% of hospital readmissions are a result of medication non-adherence
- Lower Star Ratings, HEDIS® quality scores, and CAHPS® consumer experience results
- Inability to report and prove Structures and Models of Care
