

AdhereHealth Overview

We address the half a TRILLION dollars in avoidable healthcare costs due to medication non-adherence.

AdhereHealth™ is a leader in medication adherence technologies that improve health outcomes. Our solutions uniquely include technology, tele-pharmacy and compliance packaging pharmacy services.

The Adhere Platform™ offers integrated solutions through SaaS or tech-enabled outbound tele-pharmacy services with a unique guaranteed fee structure for each patient's medication adherence conversion. Coupled with our compliance packaging pharmacy services, patients can receive medications at their doorstep through private courier delivery.

Who We Serve:

All Managed Care Organizations and Products

Self-Insured Employers

At-Risk Providers

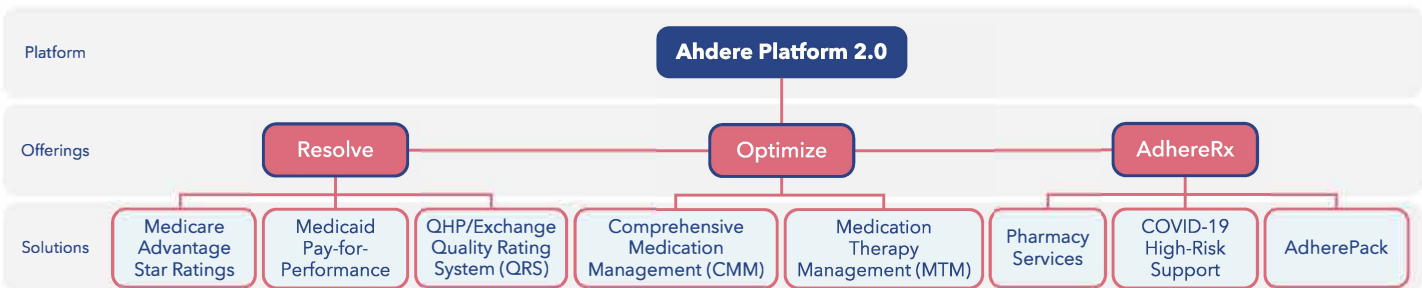

High-Risk Patients

How We Help:

- ✓ Close medication adherence gaps to improve value-based outcomes
- ✓ Reduce medical costs of care through medication optimization
- ✓ Increase Medication Therapy Management (MTM) program impact
- ✓ Compliance packaging pharmacy with private courier delivery
- ✓ COVID-19 high-risk patient support solutions

The Adhere Platform is designed to help tele-pharmacy clinicians address areas of non-adherence and gaps in care, engage with patients for better healthcare access, overcome SDOH issues and coordinate the community resources needed to improve value-based care outcomes.

Adhere Platform Offerings and Solutions

Resolve™

An end-to-end solution that focuses on the holistic patient and supports value-based care programs. Resolve™ is guided by predictive adherence targeting and tele-pharmacy intelligent clinical workflow to drive medication adherence, HEDIS® and CAHPS® improvement. The CRM uses enterprise social service tools and health plan benefits to overcome SDOH barriers and artificial intelligence for the “next best action” based on clinical engagement inputs with patients and providers.

Optimize™

An advanced medication management technology solution that supports medication optimization through value-based care initiatives focused on reducing unnecessary medical utilization. The Optimize™ tele-pharmacy offering surveils medication adherence across medical, specialty and pharmacy data to identify Drug Therapy Problems (DTP) that yield near-term cost savings. Additionally, Optimize supports identification and improvement of vaccinations (such as COVID-19 and Flu) for high-risk patient populations in rural or urban areas.

AdhereRx™

A wide range of pharmacy services and resources to support patients of all risk levels, including:

- AdherePack™ compliance packaging pharmacy (blister and strip) by dose date and time to help high-risk patients taking eight or more medications get back on track to medication adherence and better health outcomes
- Vaccination services for COVID-19, Flu and other needs in selected states
- Additional pharmacy services including medication synchronization, monthly medication reviews, prescription fulfillment, care management, transition of care, social services to overcome SDOH barriers to care, and more
