## Medication Cost and Utilization Dashboards

Powerful interactive dashboards simplify identification, stratification and resolution of gaps in care to drive cost reduction and improved health outcomes for high-risk members.

AdhereHealth™'s Medication Cost and Utilization Dashboards provide population health leaders powerful online, real-time visibility into key prescription drug-related cost and utilization information, based on members' custom risk configurations and clinical insights. Developed for one of the largest provider networks in the country, this solution uncovers, groups and prioritizes population risks through member, prescriber and pharmacy lenses, giving stakeholders a streamlined ability to achieve value-based care targets.

Users tailor information in real-time to gain actionable insights

### Organizations that benefit from the solution:

- Managed Care Organizations
- Self-Insured Employers
- Pharmacy Management Teams
- Accountable Care Organizations

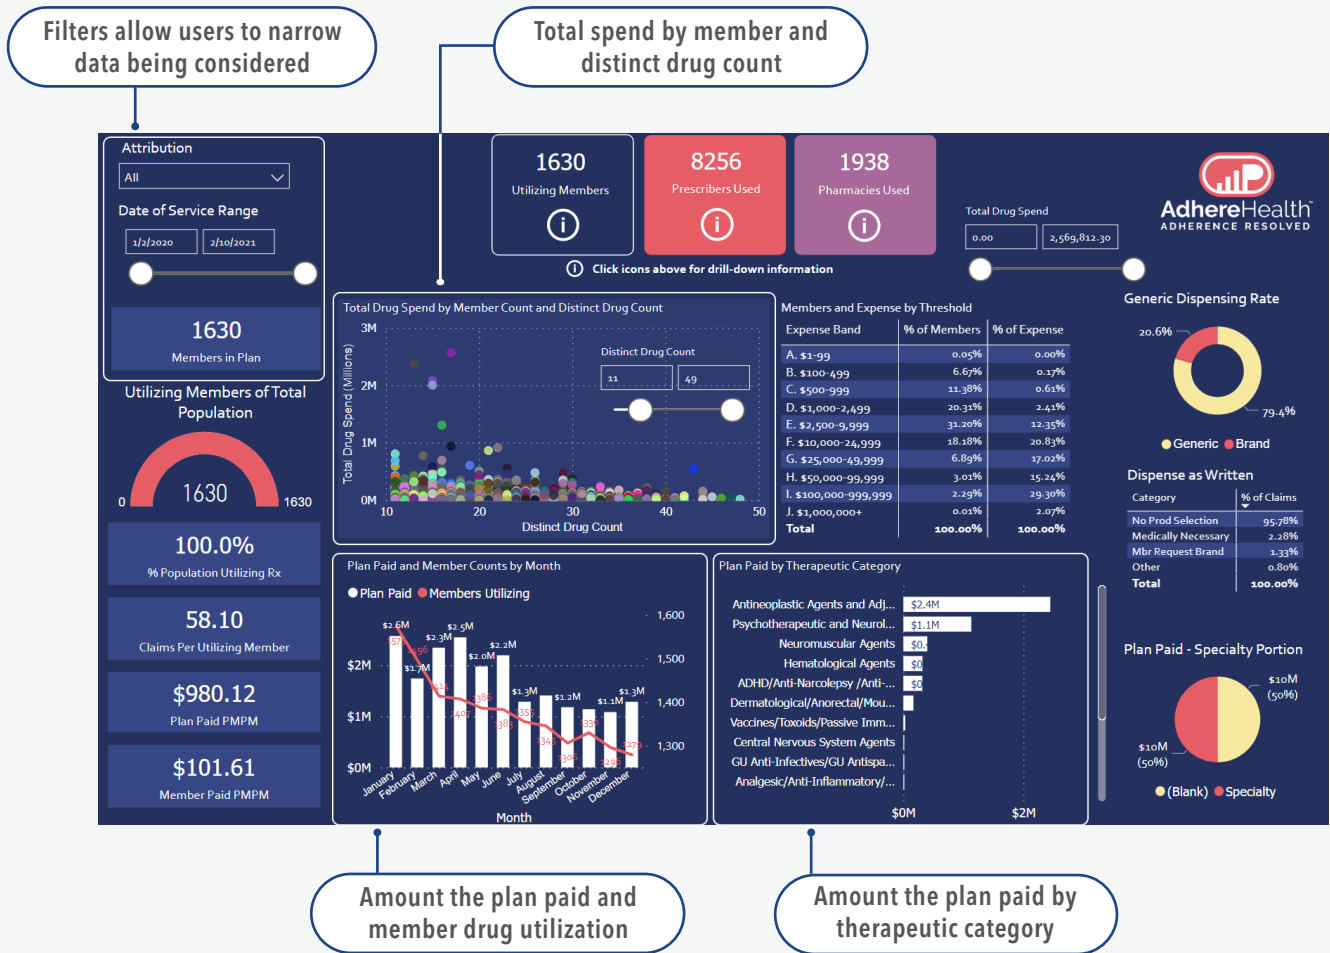

### How it Works

Users are empowered 24/7/365 through a robust compliment of configurable, simple-to-use dashboards. Views help to identify and address key indicators of member risk, medication use, prescribers managing member care and pharmacies providing member fills.

Starting from the summary dashboard, users access dynamic data visualizations and reports, which provide **key insights into:**

- Utilization by Perspective
- Specialty Utilization
- Prescriber Utilization
- Pharmacy Utilization
- Member Utilization
- Drug Utilization

Configurable, itemized and exportable member, prescriber and pharmacy target lists allow for immediate action. Users can slice, sort, filter and export personalized views using both guided experience packages, a menu of specific reports, explanatory notes and glossary of details to gain a quick grasp of how information fits into context.

## Additional Risk Stratification Modules

To further customize dashboard insights, additional modules can be selected, including:

### Clinical and Financial Insights Hub

Gain valuable data insight and direct access to all specific cost and utilization views.

### Cost and Utilization Rankings by Vantage Point

Understand member, prescriber and pharmacy cost and utilization through sortable lists.

AdhereHealth™ is a technology solutions leader in medication adherence insights and healthcare outcomes. The Adhere Platform™ touches 30 million patients through its disruptive technologies, telepharmacy services and digital pharmacy. Our dedicated team is focused on our mission to address the challenge of half a trillion dollars of annual unnecessary medical costs due to medication adherence issues, representing 16% of U.S. healthcare spend.
