# AdhereHealth™
ADHERENCE RESOLVED

AdhereHealth Overview

We address the half a TRILLION dollars in avoidable healthcare costs due to medication nonadherence.

AdhereHealth™ is a leader in medication adherence technologies and services that improve health outcomes. Our solutions uniquely combine advanced technology and telepharmacy. The Adhere Platform™ offers integrated solutions through SaaS or tech-enabled outbound telepharmacy services with a unique outcomes-based success fee structure.

The Adhere Platform™ helps telepharmacy clinicians address areas of nonadherence and gaps in care, engage with patients for better care access, overcome SDOH issues, and coordinate the community resources needed to improve value-based care outcomes.

Adhere Platform Offerings and Solutions

Engage · **Impact** · **Target**

Value-Based Reimbursement → *Leverage Stars and Quality Scores to Drive Revenue Optimization*

Optimal Client Performance and ROI → *Tech-enabled Telepharmacy Platform Analytics and Intelligent Clinical Workflow Improves Value-based Outcomes*

| Better Clinical Outcomes | Lower Overall Cost of Care | Improved Patient Experience |

Value-Based Cost Reduction → *Driving Medication Optimization to Eliminate $500B in Waste*

How We Help:

- ✓ Close medication adherence gaps to improve value-based outcomes
- ✓ Improve Star Ratings, HEDIS and CAHPS scores with action-driven patient experience solution
- ✓ Reduce medical and pharmacy costs of care through medication optimization
- ✓ Increase medication therapy management (MTM) program impact

Who We Serve:

All Managed Care Organizations and Products

Self-Insured Employers

At-Risk Providers

High-Risk Patients

Resolve™

An end-to-end solution that focuses on the holistic patient and supports value-based care programs. Resolve™ is guided by predictive adherence targeting and telepharmacy intelligent clinical workflow to drive medication adherence, HEDIS® and CAHPS® improvement. The patient relationship management (PRM) uses enterprise social service tools and health plan benefits to overcome SDOH barriers and artificial intelligence for the "next best action" based on clinical engagement inputs with patients and providers.

Optimize™

An advanced medication management technology solution that supports medication optimization through value-based care initiatives focused on reducing unnecessary medical utilization and pharmacy costs. Sophisticated analytics surveil medication adherence across medical, specialty and pharmacy data to identify Drug Therapy Problems (DTPs) that yield immediate and near-term medical and pharmacy claims cost savings.
